

SPS-U5P

Seamless Presenter Switching For Smarter Meetings

The SPS-U5P is a 5-input presentation switcher built for presentation and conference room systems that require simple source selection and multi-source display. It supports HDMI, DisplayPort, and USB-C inputs, allowing users to connect laptops, desktop computers, and other AV devices and display them on a single screen.

The SPS-U5P supports resolutions up to 4K60 and offers several Multiviewer display modes including Single, PIP, PBP, 3-Window, and 4-Window layouts through RS-232 commands. A mirrored extended output allows video to be transmitted to a remote display over category cable while maintaining high-resolution signal quality.

Users can control switching and settings through front-panel buttons, an IR remote, or RS-232 commands, making it suitable for conference rooms, training rooms, and collaborative workspaces.

MULTIVIEW

Fullscreen Mode
In the Full Screen mode, one of the four computers is displayed in full screen size and maximum resolution

Dual Mode
In the Dual Mode, the screen is split into two fields of equal size with the screen content of two video sources or computers being displayed in each of these fields.

Picture-in-Picture (PiP)
The PiP Mode is fixed in size and position; the full screen displays one of the four video sources, and a smaller image (thumbnail) containing another video source on the right-hand margin of the screen allows for simultaneous monitoring.

Quad Mode
In Quad Mode, the screen is split into four fields of equal size with the screen content of four video sources or computers being displayed in each of these fields.

Tri-View
In Tri-View Mode, the left half of the screen will display one channel and the right half of the screen will display two channels.
