

UltraCable

All-in-one, high resolution cable

- Available in PC, Sun, Apple, USB, and others
- Superior cable management
- Reduce cable stress
- Cut cable bulk by 60%

Features and Benefits

- UltraCable for superior management solutions with lengths of up to 100 feet
- Available for PC, Sun, Apple, USB, SGI, RS/6000, workstations and other platforms
- All-in-one design reduces cable stress and guards against accidental disconnect
- Available in a variety of lengths
- High resolution – up to 1600 x 1280
- Double-shielded, metal can construction
- Convenient, flexible- simple to use
- Reduces cable bulkiness
- Streamlines cable system installations
- Prevents mistakes of accidentally interchanging the connectors with those intended for another computer
- Makes cable systems easy to manage, from install to upgrades and expansion
- Universal to most Rose switches reducing system expansions and upgrade costs
- Ask about our plenum rated cables
- Call for options with audio and serial touch-screen support

The UltraCable™ Advantage . . .

The UltraCable is a high resolution, all-in-one cable that incorporates KVM connectivity into a single cable.

Superior cable management is achieved by using a single cable jacket. You reduce cable bulk and route one cable, not three.

Cable stress, which can cause accidental disconnect, is relieved in two ways. The DB25 connector secures to the switch with thumbscrews. The keyboard and mouse connectors originate from the video connector, which secures to the computer.

The UltraCable is engineered to prevent crosstalk between adjacent signals. It uses double shielded coax construction. Each end uses an internal metal can with a 360 degree solder weld to the connector. This provides maximum video resolution and reduction of electromagnetic interference.

Three separate cables are more commonly used in smaller PC-only installations, but even the economical Vista 2-port and 4-port product family offers both DB25 and PC connector models.

For distances greater than 100 feet, the UltraCable interfaces with ViewLink to extend KVMs up to 250 feet away, The ViewLink CATx product line can extend the distances up to 1,000 feet over CATx cable. The CrystalView CAT5 extenders can extend KVMs, serial and audio up to 1000 feet away, or CrystalView fiber to drive KVMs on dual fiber cable up to 30,000 feet away.

WX0606Mnnn 3 in 1 UltraCable

ROSE products with DB25 connectors, CPU to Switch				
Platform	Video	Keyboard	Mouse	Part Number
High resolution, Lengths (ft): 5,, 10, 20, 35, 50, 75, 100: substitute for nnn in part number
