OVERVIEW

The XT800 range of products allows the extension of a wide range of video and audio formats and RS232 up to 8 locations using Category 5 Unshielded Twisted Pair (UTP) cables. With RS232 communication support the XT800 allows users to send commands to single or multiple devices. This allows the user to change the volume, channel or turn on/off the display panel remotely.

RECEIVER SUPPORTS

The XT-TX400 distribution system works in concert with existing Smart-AVI receivers and accessories.

XTPRO is a high resolution UXGA and stereo audio extender system designed to broadcast desktop video, stereo audio signals, IR and RS232 over unshielded twisted pair (UTP) cabling.

With RS232 communication support the XTPRO allows users to send commands to single or multiple devices. This allows the user to change the volume, channel or turn on/off the display panel remotely.
